

Potions - Autumn Term Homework

Health and Well Being

- Create a healthy potion and write down the recipe, explaining how to recreate it (smoothie)
- Create a game with a magical theme.

Expressive Arts

- Design and draw your own magical creature, with a fact file to explain its features.
- Create a piece of music which sounds magical. It could be linked to a scene from Harry Potter.

Science and Technology

TO BE DONE WITH A PARENT!

- Investigate chemical reactions. Can you find out how different items interact (e.g mentos and coke, vinegar and bicarbonate soda, etc) Record your results
- Visit <https://rediscoveredfamilies.com/harry-potter-science/> and try out some of the investigations. Share your work on Teams.

Humanities

- Look at the features of a map and then design a map of a magical place – don't forget a key.
- Research a country, finding out about mythical and magical stories from their culture.

Mathematics and Numeracy

- Gather data to show your friend's and family's favourite Harry Potter: Book, Character, Food or House. Choose a suitable way to share your results. (graph or chart)
- Create your own map of a magical place. Add coordinates to the map. Create a treasure hunt around the map using coordinates and other mathematical questions or instructions.

Minimum Expectation

Regular reading – 5 times a week
Practise times tables (TT Rockstars) and number bonds.
Regular spelling practise – Spelling Shed and Spelling Attack at home.

Language, Literacy and Communication

- Create your own potions books, with instructions and illustrations about how to make them.
- Write a letter to Professor Dumbledore, explaining why you should be allowed to join Hogwarts School of Witchcraft and Wizardry.
- In Welsh, describe a character from the Harry Potter books. Use the help sheet on Teams.
